

# GUTTER SYSTEM

THE HOUSE AT ITS BEST

[www.vinylon.com](http://www.vinylon.com)

## 5 REASONS TO BUY VINYLON GUTTERS

1 

### DURABILITY AND RELIABILITY

Extra reinforcement ribs for the trough and brackets boost the system's ability to withstand snow loads. Thanks to its secure fastening, the mounted bracket is capable of withstanding loads up to 100 kg.

2 

### SPILLOVER PROTECTION

The design of the sleeve increases throughput capacity by 30% compared to other systems of the same diameter. The special shape of the trough protects it against spillover – even in downpours.

3 

### INSTALLATION IN HALF THE TIME

Our patented interlocking system: bracket-trough-sleeve, cuts installation time in half. Micro-supports on all system elements allow for the quick adjustment of expansion gaps.

4 

### LONG SERVICE LIFE

Watertight sealing made of PVC and silicone alloy maintain their durability and flexibility within a temperature range of from -60° to +50°C throughout the entire duration of service life.

5 

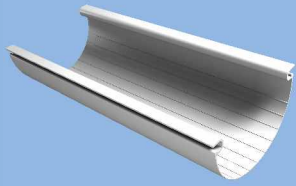

### MANUFACTURER'S GUARANTEE

Only high-quality raw materials and cutting-edge equipment by the leading Western manufacturers are used in the production process. VINYLON gutters come with a 50-year guarantee.

THE HOUSE AT ITS BEST

125 gutter  
length 3000/4000 mm

Universal angle  
90°
